## V Construction machinery

### Our Company

V Construction Machinery traces its beginnings to 2016, when it began selling hydraulic filters, oils, and fasteners to townships and counties. Within a year, the company had expanded its product line to include SLCM spares and construction equipment, such as machinery, drums, chutes, etc.

The first location was housed in a Jalahalli cross in Bangalore, and the company has steadily grown over the last five plus years. Today, V Construction Machinery Company serves all over India with over 100 business partners. The company has received accolades as the largest privately owned and largest SLCM spare manufacturer in India.

The company's expansion is to ensure that our customers will consistently receive proper care for their equipment, strategically locating each branch for optimum service.

Our business partners all over India care deeply about ensuring that their customers receive first-class treatment.

The company has chosen equipment brands that perform all day, every day, and they always deliver excellent parts and service support.

### Our Services

V Construction Machinery helps maximize uptime for customers with same-day parts delivery and on-site emergency service 24 hours a day. Technicians undergo extensive training and are factory-trained for any equipment they service. They routinely troubleshoot a situation to identify problems and quickly offer solutions to enhance your equipment's performance.

When you need extra machines, V Construction Machinery will deliver clean, well-maintained rental equipment right to your job site. You can always count on getting good value by choosing a machine that meets your equipment needs from our used equipment fleet.

### Our Customers

Customers who purchase equipment, parts, and services from V Construction Machinery represent a wide range of businesses—residential and commercial construction companies, road builders, excavating contractors, utility contractors, landscapers, government agencies, quarries and aggregate processors, farmers, municipality crews, and all sorts of industries with warehouses and routine maintenance needs.

### Our Equipment

We carry the complete line of self-loading concrete mixer equipment, parts, service, and rental.

### VISION

**“To enable our clients to achieve engineering excellence through innovation in the best manner possible.”**

### MISSION

**“Customer Satisfaction through Cost, Quality and Delivery, Keeping Customer service as priority”**

### Our Capabilities

Specializing in heavy steel fabrication, Steel Fabrication Service delivers quality products. Manufactured by our team of highly skilled welders and fabricators. A high standard of workmanship, together with timely delivery and a competitive price our commitment to excellence in the steel fabrication industry ensures you will have total peace of mind with your product. No job is too big or too small for our team.

***No matter what you require, our team can make your expectations a reality.***

## Our company's infrastructure

Our company features a diverse range of dedicated industry professionals. Mechanical Designers, Draftsmen, CAD Programmers, Fabricators, Skilled Welders and Customer Representatives.

Registered office, 10000 sq. ft., located in Bangalore city on Peenya, and all required infrastructure for conducting manufacturing activities. A team of 20 technicians and engineers work in the factory. Strict adherence to all statutory requirements of the local government bodies.

## List of machineries

Overhead crane facility for material handling up to 7.5 tons

Plasma cutting: 7000mm x 3000mm

Shearing Machine

Lathe Machine

Radial Drilling Machine

Sheet rolling machine up to 12mm thickness

Co2 welding facility

Power Generators

Compressors Etc...

# Parts

When you need them

- V Construction Machinery maintains an inventory of all types of parts and is one of the largest manufacturers of SLCM parts in India.
- Most parts are available within 24 hours
- Parts for many makes and models
- So many years of combined experience in our parts department

## Fast Availability

V Construction Machinery has an inventory of all types of parts to deliver your parts as quickly as possible. Check catalogs for the correct part number, and call the location nearest you. Our parts and service team has extensive experience with parts to help you find whatever you need. If it's not in stock, we'll locate the part through our network of parts resources

## Call to Order

You can always call the parts department to order your parts.

# Shop Services

The latest repair and diagnostic equipment, well trained technicians

- Engines and transmissions can be repaired or rebuilt
- Hydraulic repairs are completed quickly, efficiently
- Remanufactured or rebuilt pumps, motors, and drive units are an economical alternative to buying new

## Diagnostics

V Construction Machinery's facilities are equipped with state-of-the-art diagnostic tools that provide accurate machine evaluations to pinpoint problems, whether they are with engines, drive trains, or hydraulic systems. Our shop staff is factory-trained to correct equipment problems quickly and cost-effectively, which minimizes your downtime.

## Components Division

V Construction machinery rebuilds used components as a less expensive alternative to buying new. The components division works with a wide variety of brands and types of components.

# Used Parts & Attachments

Huge savings over buying new

## Used Parts

V Construction Machinery has an extensive inventory of used parts and components. From engines and transmissions to alternators and axles, our inventory of used parts will keep your machine up and running.

## Used Attachments and Buckets

If your skid steer, excavator, or other piece of equipment needs a specialty attachment, check out V Construction Machinery's selection of used buckets, couplers, and attachments.

## Take-Off Parts

V Construction Machinery offers new OEM take-off parts. These components are supplied in "like-new" condition and typically come from equipment with component modification or replacement for a specific purpose.

## Remanufactured Parts

V Construction Machinery partners with several companies that offer remanufactured parts at a discounted price when compared to new parts.

# Hydraulic Hose Assemblies

Huge selection, top performance

Avoid lost production time from hose failure

Choose from our large inventory and keep spare parts on hand to avoid downtime

## All Makes, All Models

Parker and Manuli offer the widest variety of hoses in the industry, including braided, spiral, multi-purpose, Push-Lok, transportation, refrigerant, suction & return, and more. V Construction Machinery stocks hoses in all ranges, compatible with permanent crimp-style fittings. Our expert technicians will help you determine exactly what you need.

## Reliable

Expertise in workmanship, combined with the correct hose and fittings, assures performance under a wide range of working conditions, pressure requirements, and heat tolerances.

**Keep spare hoses on hand to avoid downtime**

# Fluid Analysis

- Identify minor problems to avoid major failures
- Extend equipment life—Contaminant levels in fluids dictate when to replace filters
- Increase oil drain intervals—The condition of your oil indicates when oil changes are actually necessary
- Increase resale value—Fluid analysis records prove your equipment has been maintained

## What is Fluid Analysis?

In our fluid analysis program, fluids are taken from several areas of your equipment and analyzed by qualified laboratories to determine the levels of contaminants in the various fluids. The level of each contaminant is compared to normal wear rates so that potential problems with components can be identified before failure. The trends for the contaminant levels in your equipment also provide valuable information on potential problems.

V. Construction machinery monitors your fluid analyses. We will provide guidance on necessary repairs and filter and oil change intervals based on the results of your equipment.

## General Guidelines for Sampling Intervals

- Engines 500 hours or at manufacturer's recommended Change intervals
- Transmissions 500 hours or at manufacturer's recommended Change intervals
- Hydraulics 500 – 1000 hours
- Differentials 750 hours
- Gearboxes 750 hours

# Equipment Paint Shop

- Full service paint shop
- All types of welding and fabricating
- Panel straightening
- Custom paint & custom decaling

## First Impressions Count

Appearances do matter. Of course, performance is the defining measurement of your work, but how your equipment looks can affect how your business is perceived. Repainting weathered equipment can be a great investment for your business.

## Maintain Equipment Value

Equipment that looks new is valued higher for resale. And paint protects your equipment against rust and wear. Maintaining the appearance of your equipment by repainting, when needed, could pay off in the long run.

## Our Painting Facilities

At our paint shop, we can meet all of your painting needs, from painting a machine back to stock to applying a custom paint job. The paint booth is sized to accommodate most types of equipment. Additional services are available, including welding and fabrication, and panel straightening

# Rental Equipment

## Supplement your fleet with our top quality equipment

Clean, well maintained equipment Delivered to your site recent models

When you need extra machines, V Construction machinery will deliver clean, well maintained rental equipment right to your job site.

### Rent Construction Equipment for Any Project

At V Construction machinery we can help you match the right rental equipment to your specific project. Our equipment is low hour, well maintained, reliable, and works the first time, every time.

### Clean, Well Maintained Equipment

We take care of our rental equipment, so it's in top condition for you any time you need extra help on a job. Equipment inspections are performed regularly, and maintenance is performed at intervals recommended by the equipment manufacturer. Repairs are always completed promptly, so you'll never be inconvenienced by unexpected downtime when you rent from V Construction Machinery.

### Recent Models

Our equipment fleet is routinely updated. We rotate out older models and sell them in our used equipment fleet and replace them with new equipment. Renting from Southeastern Equipment is the perfect opportunity to try out a model you're thinking of purchasing. Ask about our convenient rent to own options.

### Delivered to Your Job Site

We can deliver any equipment you need right to your job site. Or, if you'd rather, you can pick up your equipment at any of Southeastern Equipment's convenient locations.

**You can depend on V Construction Machinery for anything you need to help you complete your jobs on time.**
